

PHOS-CHEK® WD-881 CLASS A FOAM FACT SHEET

PRODUCT TECHNICAL BULLETIN

COMPOSITION

PHOS-CHEK® WD-881 is a Class A foam concentrate. It is composed of a mixture of surfactants and other performance components dissolved in a water miscible system. When the concentrate is diluted with water, it produces an excellent “wet water” which then forms a stable foam when mixed with air.

PHYSICAL PROPERTIES

Appearance/Odor:	Tan liquid with a hint of orange blossoms
Viscosity:	50 centipoise @ 75 °F (24 °C) 150 centipoise @ 40 °F (4 °C) 450 centipoise @ 32 °F (0 °C)
Weight @ 68 °F (20 °C):	8.53 lbs. per U.S. gallon or 1.029 kilograms per liter
pH:	7.5 ± 0.5
Flash & Fire Point:	No flash or fire when tested via a closed cup method. 260 °F (127 °C) flash and 268 °F (131 °C) fire point when tested by an open cup method
Water Solubility:	Readily self-disperses and dissolves in fresh, brackish and sea water at all concentrations
Corrosivity:	Meets Interagency Standards (USDA Specification 5100-304a) for aerial and ground application. Approved for use in fixed-tank equipped helicopters
Surface Tension:	25.2 dynes per square centimeter for a 0.1% water solution
Sea Water & Long-Term Retardant Compatibility:	Totally compatible
Freeze-Thaw Stability:	(note: place above in table form)

ENVIRONMENTAL & TOXICOLOGICAL

PHOS-CHEK WD-881 Class A foam is highly biodegradable. More than 85% reverts to carbon dioxide within 28 days exposure at ambient conditions in the environment. The toxicological properties of PHOS-CHEK WD-881 Class A foam concentrate and its water solutions have been evaluated according to Interagency Standard 5100-307 and shown to meet its requirements. The concentrate is severely irritating to the eyes and moderately irritating to the skin. Prolonged or repeated contact with the concentrate may produce skin irritation and inhalation of its mists may irritate the lining of the nose and throat. Eye protection shall be worn and the use of gloves is recommended when handling the concentrate. Exposed skin should be washed as soon as possible. These precautions and practices are similar to those which are used with any heavy-duty detergent. Water solutions of PHOS-CHEK WD-881 Class A foam at use level concentrations (0.1 to 1.0%) are only slightly irritating but should be washed from the skin as soon as practical as drying and chapping could result from prolonged exposure. Also, rubber boots or shoes are recommended for those who work in and around foam since the wetting properties of even dilute solutions of the PHOS-CHEK foam concentrates will result in penetration of leather footwear and the discomfort arising from prolonged periods of wet feet.
